

Applying a Problem Solving Approach to Behaviours: Dementia Australia Virtual Classroom

Understand changes in behaviour of people living with dementia. Implement client-centred strategies to reduce the negative impacts.

Discover an analytical, client centred approach that incorporates a needs-based perspective for problem solving using Dementia Australia's CAUSED model of understanding behaviour.

When: Thursday 22 August, 10:00 am to 1:200 pm

Facilitator: Dementia Australia

Cost: FREE for aged care staff and volunteers (places are limited - priority of access to CHSP funded services)

Online via **Zoom**
